

Solar-Active

Tell Me, I'll Forget, Show Me, I'll Remember, Let Me Do It, I'll Understand. Chinese Proverb

We have successfully developed an educational method and resources that focuses on gaining knowledge, understanding and skills through real life application of scientific and mathematical concepts. CPD training workshops are on offer in how to use our unique renewable & energy efficiency education resources to develop and apply one's inventive and problem solving skills. Family workshops and courses are being conducted working directly with community/environmental organizations, young people, educational institutions (Primary, Secondary, FE/HE) and professionals (architects, Local Authority & Borough Council officers and teachers) and the general public .

Workshop

We are offering a new hands-on training workshop that focuses on getting the full educational value from our renewable energy resources. The workshop will demonstrate how to use our kits and demonstrations to deliver sustainability, climate change and energy efficiency in the school curriculum. This can be done across a wide range of subjects: Design & Technology, Engineering, Science and Mathematics.

Solar Challenges

Since 2002 our car/boat kits have been used in Solar Challenges by 50+ Local Authorities/Borough Councils. Contact david@solar-active.com for further details on how to participate in your local Solar Challenge AND how to bring our method of education into your school.

Car-Boat kit

The educational kits are powered by state-of-the-art, record-breaking solar technology. Our photovoltaic cells are flexible, robust and work well in diffuse light conditions; making them well suited for the UK school learning environment. The kit includes all the components required to make the model car and transform it into a solar boat, interactive CD, access to teaching materials, technical information and specialist support. Other resources are available

Car-Boat Kit

Energy Efficiency

We have conducted family based education sessions using our solar car/boat resources with children and their parents/guardians. Each session focuses on one having direct experience in learning scientific concepts also using our interactive demonstrations and school/home energy surveys & audits.
